About This Game

STORY

"As the Children of the Ancients sweep through the mining operations of the Northern Provinces, destroying all in their path, the Executor flexes the industrial might of the State to quell local rebellions. Laperia burns and Kimmel, the charismatic leader of the Children, will stop at nothing until the empire is reduced to flinders."

GAMEPLAY

Fractured State refines the RTS genre into fast-paced strategic urban combat where the machine driven imperialistic faction of the Laperian Imperial Army battle to remain in control against the Children of the Ancients, worshipers and masters of an ancient power. Choose a side then vie for control of each territory where taking over new buildings gives tactical advantage, provides the ability to recruit more specialized units and army wide bonuses, as well as impart overall dominance of the area.

Doing away with overly complex micromanagement and mass resource gathering, *Fractured State* focuses on battle strategies in an urban environment. The only real resources you must manage are your troops, building occupation and time. Each specialized unit requires a specific amount of time to prepare to enter the fray and each building you take control of determines map population, recruitment options and territorial control.

Created by modders for modders, *Fractured State* is being built from the ground up to embrace the modding community by focusing on mod-friendly design options throughout development.

In a land engulfed in a brutal civil war split between technical advancement and ancient ways, magic and machines, oppression and rebellion – which side will you choose in this fractured state?

TERRITORY CONTROL

Battle maps are split up into territories. Occupy the most structures in a territory in order to keep control of it. Territories provide army-wide bonuses and increase the number of troops you can control. Reinforcements you request arrive via your controlled territories. Controlling territories and denying your enemy a foothold are the keys to victory.

BUILDING OCCUPATION

Buildings represent important strategic points; this is primarily an urban war after all. Some buildings unlock abilities, new units, passive bonuses, or squad refreshes. Storm buildings to uproot and destroy entrenched enemy forces. You have full control of your units whether they are inside or outside.

WEAPON ACCURACY & RELOADING

Your soldiers must keep a mental count of their ammo, or else they could lack it at a crucial moment. No soldier hits his mark 100% of the time, and no weapon is completely accurate. Distance plays a role. Closing down on your target is dangerous but can yield better results.

COVER

The most common cause of death for soldiers of the Laperian conflict is exposure. And bullets. And exposure to bullets. Cover makes your units harder to hit. Troops in cover can be dispatched more easily by flanking and rear attacks. Troop placement and cover management are critical to your success.

Tower-Defense game with potential.

The Coop- and Multiplayer Part are a joke, only two maps to play.

For Single Player there are around 20 Maps.

First of all the first wave starts if you are ready or not, what would be no problem, if you had enough time so sort your minds and make a plan, but that isn't.

The controls are technically not bad, but have to adjust a little bit.

e.g. the zoom is on mousewheel, is you want to place a tower the mousewheel will rotate the tower. (Perhabs that shut a additional combination like shift+mousewheel)

If you are in menu and want to scroll down, you zoom ingame to.

So make more multipayer/coop- maps, a higher start-countdown (with readybutton for skip), adjust some towers and creeps a little, then we will look at that game again.. I bought this game at a Dreamhack event.

Guys, this is totally worth the 20\$... IF, you enjoy managing/tycoon games and Dongeon&Dragons.

This is still in Alpha and the story is already funny, the game is so far well balanced and has very few bugs.

10/10, would spend another unreasonable amount of time on a late Sunday night before an early Monday morning....anytime !. Fun. Would be better if people actually played.

4V10. I just installed AO International Tennis and after i download some players from community and after i play one match in the career it shows me loading data error. How should i fix this?. DLC contains more Kanako screentime. Great story. I've finished all 4 options. Love the CG art style. Likeable hot vampires/non-vamps.

There's a good and bad ending for each character.

The bad endings for Isaac and Luka are actually very interesting in a... sad "you shouldn't be enjoying this you weirdo" sort of way.

Rex and Dominic's bad endings were not as engaging (likely because there is no CG for their bad end), but that's hardly a drawback.

If you want a historical accurate game. Then this turn based game is for you. I got really impressed at the second dynasty. Yes you can build great pyramids. But if you build too many big ones, then first the building costs become a problem, but and that's very well designed later also the maintenance costs go through the roof. Just like in real history happened, your later pyramids or mastabas tend to get smaller again.

I think i'm going to play this as much or more as Clarus Victory earlier games.. iT MAKES FUN TO PLAY IT. On my Windows 10 the game always crashes after the main menu.. This is the final in the Alien Breed games that I own and again this is like the others, an enjoyable effort from Team17 to create a twin-stick shooter but not my kind of game. Gameplay is the same as the others in the series basic but it works for the game, the story is built up and in depth, and there are good gameplay aspects that come around as you play the game. The in-game logs also allow you to delve deeper into the story if you wish to read them.

Again I would rate this a 6/10, fun for others but not my kind of game.. I think Dr Zoidberg created this game the controls are terrible story is boring overall utter rubbish total waste of money DO NOT BUY.

. Feedback & Plans:

Hello tigers! Thank you all for your feedback and contributions to Congo, we read every comment and review and it's really helping us focus on what needs to happen in the next few updates.

We are currently working on an update that should hopefully smooth over some of the issues people have been experiencing. One of the issues is optimization and the performance. We have just updated to a newer version of Unreal Engine 4.. We've gone from 4.5 to 4.7 and there's a number of features in this more recent version of UE4 that will directly affect the performance.

A lot of the performance increases will be through the foliage system, lighting system and the navigation systems which should increase frame rates. After v0.3a, it will be great to hear from you guys and see what differences it makes to you.

It also seems that a number of people have been experiencing crashes and gamefreezes. This is something we are determined to fix, if you have experienced a crash, please let us know by sending us the details of the crash and your system specs to support@theinnocentdevils.com

We'll be updating the options as well, increasing the number of resolutions available and trying to sort issues in fullscreen mode and other window modes.

Please don't hesitate to get in touch if there's anything you've experienced any issues playing Congo! :)

Thanks!
