Overall an enjoyable point and click game.

Nice puzzles but some where annoying cause moving Holmes felt extremely clunky and slow (looking at you stealth and forest timed sections even if super short). Nice story even if the voice acting was "meh" at best...

Quite short so I recommend it only on a discount.

P.S.: Only the first 5 pictures of the preview are of the game, the other 5 are from Sherlock Holmes:Nemesis game.. this is not a game, pictures and you can click around, Puzzles - lol you can not hit anything with your mous, you need 10000 clicks that I open a chest, because i don't hit some magic spot on the pictures. **DON'T BUY THIS!!!!!!** And don't buy randomkeys :). The puzzles are cool - reasonably challenging. The "com log" narrator is too much of a♥♥♥♥♥♥. If you make a "perfect" run possibility, don't snark me for retrying until I get it.. This game reminded me my childhood <3333. Really good game. You can't get anything much better from unreal engine. I'm Ukrainian myself, and I can tell you, this game is very accurate representation of how it is to live in Ukraine. Graphics are very realistic, I felt like I was looking out the window when I played this game. Music sounds asian, but that's ok cuz most Ukrainians are weeps, so that's what you would usually hear outside. Character are memorable and relatable. Story is deep and touching. Gameplay wise, you have to dodge the bullets, rockets and stuff like that, just like in real life, you know. You also have to explode various Russian heavy weaponry, just like in real life, you know. This game also requires you to be good at navigating building destroyed by explosions, you know, just like in real life. You can also play with your friends, and feel despair as all your friends around you die. Requires UDP terraria port and TCP csgo port opened for hoster.

i r8 8V8 masterpiece game of the decade

(actually it's really buggy, but it's fun to play if you got friends)

A game that is a kind of mix between Megaman and Gradius in a sense.

It's a simple little platformer that allows you to upgrade your abilities as you make your way through the stages.

Graphically it looks nice. I find the towns stages to be some of my favorites. But the platforming seems a tad bland and forgettable although a lot of the enemies are cute.

There are a few modes of difficulty starting with easy x 2, casual and higher. I played it on casual and found the game to be way too easy and wishing it was more difficult by the third boss, of which I can easily dispatch in under a minute and you can't change the difficulty to anything harder than what you started with once you start the game.

Since the game has multiple weapons I feel it's time to talk about them. Outside of your primary weapons the linear and comet all other weapons are useless and are more of a hindrance and not necessary. You can beat the entire game with just Linear and comet. Heck using the shop you can actually make it so you are overpowered before a stage even begins properly.

Overall it's kinda alright but the platforming is bland and every weapon outside of what you start with is useless to bad.

But I've played worse, so give it a shot if you have a couple hours to spare.. Luna's Wandering Stars is complete ♥♥♥♥♥♥♥♥

that has no appeal whatsoever to anyone who has half a braincell. Looking at the horrible steam page made me want reimbursement for all the mental damage, but buying it almost gave me cancer. AVOID. Typical Sherlock game. Had lots of fun. Some of the cutscenes were a bit lengthy. Make sure to save in this game. There are a few points where you will lose all progress if not saved.. I can't start the game because the menu button isn't working,

I want to play game, so plz fix it as soon as fast.. She's really good and fun to use. Well worth the money but unfortunately you have to beat zero dimension and during hyperdimension you need to pick Noire's story before using her. Once you get her you'll see what I mean but good and fun to use.. 100% recommended. Absolutely stunning OST
